Project Design Phase-II
Data Flow Diagram & User Stories

Date	30 September 2026
Team ID	SN-TRANSFORM-01
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Data Flow Diagrams:

This project uses data-flow views to show how employee spreadsheet rows move through ServiceNow staging, transformation, validation and reporting. The diagrams identify the source, processing steps, data stores and outputs.

ServiceNow Employee Import Data Flow

User Stories – Employee Spreadsheet Import

The user stories below translate the project workflow into testable administrator, HR and data-quality outcomes.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
ServiceNow Administrator	Spreadsheet Intake	**USN-1**	As an administrator, I can load Sample Spreadsheet.xlsx into Employee Import.	Import Set is created with the expected header and row count.	High	Sprint-1
ServiceNow Administrator	Target Table	**USN-2**	As an administrator, I can create Employee Test with the five required string fields.	Employee ID, Name, Email, Department and Location are visible.	High	Sprint-1
ServiceNow Administrator	Transform Map	**USN-3**	As an administrator, I can create Sample Spreadsheet Import from Employee Import to Employee Test.	Source and target tables are selected and saved.	High	Sprint-1
ServiceNow Administrator	Field Mapping	**USN-4**	As an administrator, I can auto-map and review field mappings before transforming.	All five fields are mapped correctly and reviewable.	High	Sprint-1
HR / Data Owner	Data Validation	**USN-5**	As a data owner, I can confirm imported employee values in Employee Test.	Records contain the expected IDs, names, emails, departments and locations.	High	Sprint-1
ServiceNow Administrator	Coalesce	**USN-6**	As an administrator, I can set Coalesce on Employee ID.	A matching ID is treated as an existing record rather than a duplicate.	High	Sprint-1
HR / Data Owner	Recurring Import	**USN-7**	As a data owner, I can load a later file with changed values and new IDs.	Changed existing IDs update and new IDs insert.	High	Sprint-2
ServiceNow Administrator	Transform History	**USN-8**	As an administrator, I can inspect transform history after each run.	Inserted, updated, ignored and error outcomes are visible.	High	Sprint-2
ServiceNow Administrator	Repeatability	**USN-9**	As an administrator, I can repeat the same file without creating duplicates.	Identical rows are ignored or show no-change outcomes.	High	Sprint-2
HR / Data Owner	Department Report	**USN-10**	As an HR user, I can view Employees by Department as a pie chart.	The report counts records grouped by Department.	Medium	Sprint-3
HR / Data Owner	Location Report	**USN-11**	As an HR user, I can view Employees by Location as a bar chart.	The report counts records grouped by Location.	Medium	Sprint-3
ServiceNow Administrator	Analytics Dashboard	**USN-12**	As an administrator, I can add the three employee reports to Employee Analytics Dashboard.	Department, location and list reports appear together.	Medium	Sprint-3
